Description

The Employee Directory Web Part reads the user entries from a Sharepoint List and displays the selected user fields in a list.

The Web Part is compatible with WSS 3.0, MOSS and Sharepoint 2010 (including "Foundation").

The following parameters can be configured:

- Sharepoint List containing the Employee data
- List columns to be displayed
- Filtering, Grouping, Searching, Paging and Sorting of rows
- AZ Index
- optional Header text

Prerequisites

Before you attempt to deploy the solution you need to make sure that you have the following installed on your server(s):

- Microsoft Office SharePoint Server 2007 or WSS 3.0
- or Microsoft Sharepoint 2010

Installation

Manual Installation

1. download and unpack the **AEEmployeeDirectoryWebpart.zip** file.
The ZIP archive contains the AEEmployeeDirectoryWebpart.dll and the AEEmployeeDirectory.webpart files.
2. drop the **AEEmployeeDirectoryWebpart.dll** either into the SPS web application bin directory or into the GAC of your Sharepoint server (c:\windows\assembly).
3. add the following line to the "<SafeControls>" section of your Web.Config file.
Please make sure that the line is added as one single line (no line breaks):

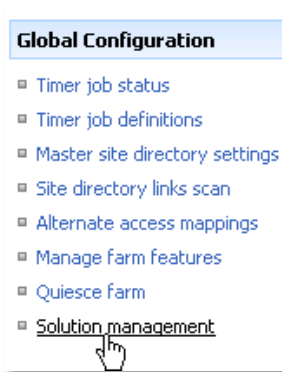

```
<SafeControl Assembly="AEEmployeeDirectoryWebpart, Version=1.0.0.0, Culture=neutral,
PublicKeyToken=cd279112387b2a50" Namespace="AEEmployeeDirectoryWebpart" TypeName="*" Safe="True" />
```

4. from the top site go to "Site Actions/Site Settings/Modify All Site Settings/Galleries/Web Parts"
5. use the "Upload" menu option to upload the AEEmployeeDirectory.webpart file.

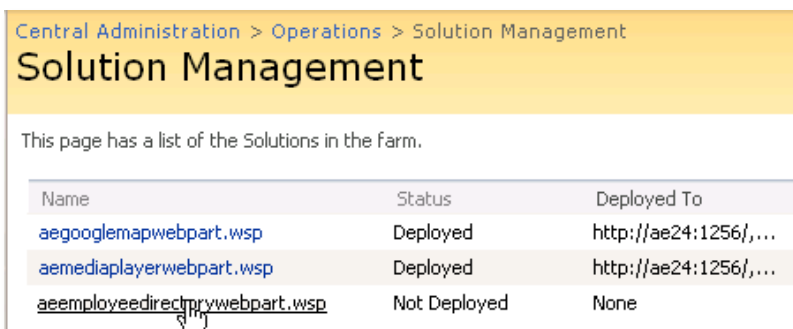

Automatic Installation

1. Unpack the **AEEmployeeDirectoryWebpart.wsp** and **Install.bat** files from the Zip Archive and place the 2 files onto your Sharepoint Server.
2. Add the Solution by either running **Install.bat** or manually entering:
`stsadm -o addsolution -filename AEEmployeeDirectorywebpart.wsp`

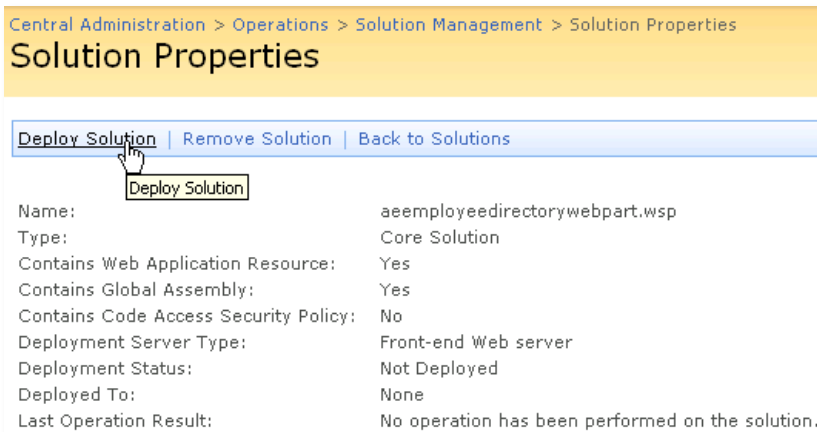

3. Deploy the solution by navigating with your browser to “Central Administration->Operations->Solution Management”:

4. You should now see the **AEEmployeeDirectoryWebpart.wsp** in the farm’s solution store:

Click on “AEEmployeeDirectoryWebpart.wsp” to deploy the solution:

5. Proceed to activate the feature by navigating to the “Site Actions/Site Settings” page in your top-level site:

Choose “Site collection features” to navigate to the Site Collection Features page:

Site Collection Features

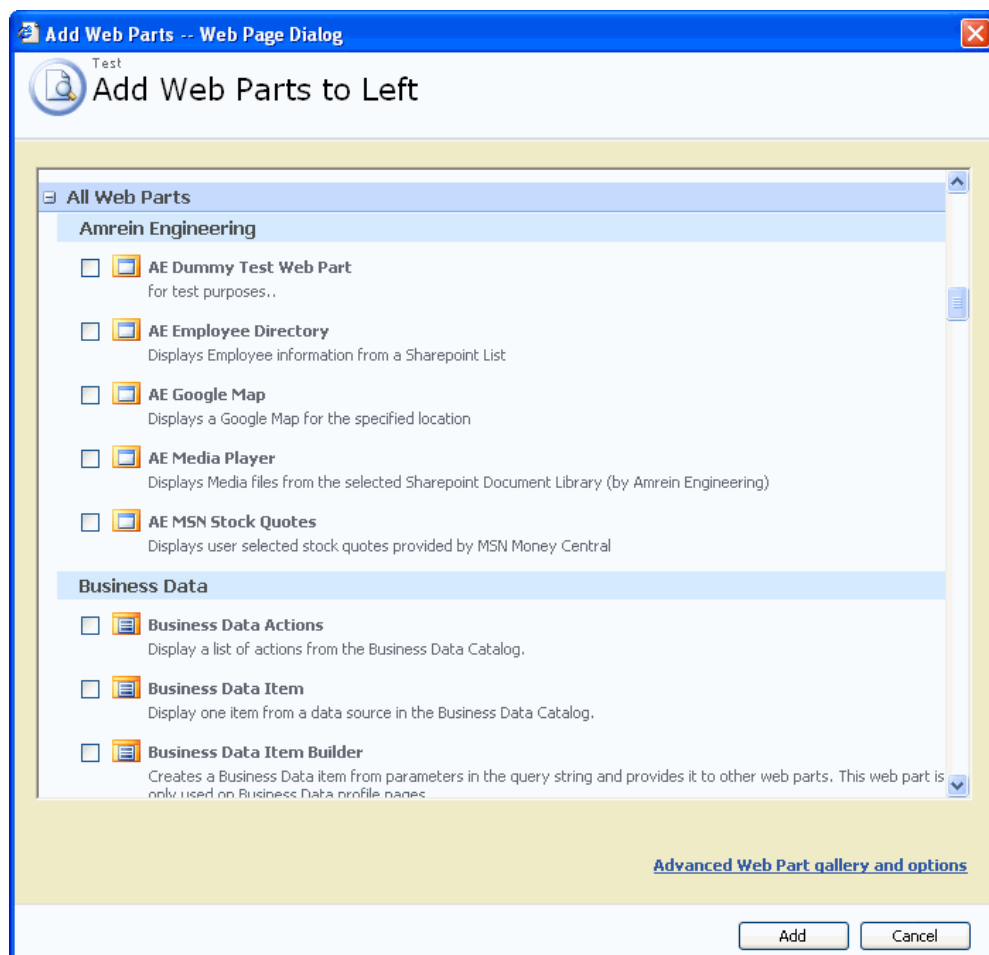

Name	Status
 AddNumbers	<input type="button" value="Deactivate"/> Active
 AE Currency Rates Web Part Displays live currency rates as provided by Yahoo	<input type="button" value="Deactivate"/> Active
 AE Employee Directory Web Part Displays Contacts Information as a Staff Directory	<input type="button" value="Activate"/>

Activate the "AE Employee Directory Web Part" feature

Adding the Web Part to a Page

Navigate to a page where you would like to place the web part and choose "Site Actions/Edit Page"

1. Add the web part to the appropriate zone. The web part is listed in the "Amrein Engineering" gallery section :

Web Part Configuration

“Employee Directory” Sharepoint List:

Create a new “Employee Directory” Sharepoint List (if not already present) . This List will hold the Employee data to be displayed by the web part. Please make sure that all users which should be able to edit their own entries should have at least “Contribute” List permissions.

Add any number of suitable List columns to the List as needed.

Web Part Settings:

Configure the following Web Part properties in the Web Part Editor "Miscellaneous" pane section as needed:

The image shows a screenshot of the 'Miscellaneous' pane in the Web Part Editor. The pane is titled 'Miscellaneous' and contains several configuration fields, each with a yellow highlight in the input area:

- Site Name:** An empty text box.
- List Name:** A text box containing the word 'Employees'.
- View Name:** An empty text box.
- Field Template:** A text box containing 'Last Name;First Name;Job Titl'.
- Group By:** An empty text box.
- Sort By:** A text box containing 'Department'.
- AZ Index Column:** A text box containing 'Last Name'.
- Search Box:** A text box containing 'Last Name;First Name;Depart'.
- Rows per page:** A text box containing the number '10'.
- Image Height:** An empty text box.
- Header Text:** An empty text box.
- License Key:** An empty text box.

- **Site Name:** Enter the name of the site that contains the Employee List:
 - leave this field empty if the List is in the current site (eg. the Web Part is placed in the same site)
 - Enter a "/" character if the List is contained in the top site
 - Enter a path if the List in in a subsite of the current site (eg. in the form of "current site/subsite")
- **List Name:** Enter the desired Sharepoint Picture Library
- **View Name:** Optionally enter the desired List View of the list specified above. A List View allows you to specify specific data filtering and sorting.
Leave this field empty if you want to use the List default view.

- **Field Template:** Enter the List columns to be displayed (separated by semicolons). User pictures can be attached (via File Upload) to the Sharepoint List items and displayed using the symbolic “**Picture**” column name. If you want to allow users to edit their own entries, please add the symbolic “**Username**” column name to the Field Template. An “Edit” symbol will then displayed to allow the user to navigate to the corresponding Edit Form:

Example:

Picture;LastName;FirstName;Department;Email;Phone;Username

Friendly Header Names:

If you would like to display a “friendly header name” instead of the default property name please append it to the User property, separated by the “|” pipe symbol.

Example:

Picture;LastName | Last Name;FirstName;Department;Email | Email Address

- **Group By:** enter an optional List column to group the rows.
- **Sort By:** enter the List column to define the default sort order.

Example:

Department

- **AZ Index Column:** enter an optional List column to display the AZ filter in the list header. If an “!” character is appended to the property name, the “A” index will be forced when visiting the page. Example: **LastName!**

- **Search Box:** enter one or more List columns (separated by semicolons) to allow for interactive searching. Example: **LastName;FirstName**

- **Rows per page:** the Employee Directory web part supports paging and lets you specify the desired number of rows per page.

- **Image Height:** specify the image height in pixels if you include the “Picture” column. Enter “0” if you want to use the default picture size.
- **Header Text:** enter an optional header text. Please note that you can embed HTML tags if needed.
- **License Key:** enter your Product License Key (as supplied after purchase of the “Employee Directory Web Part” license key). Leave this field empty if you are using the free 30 day evaluation version or if you choose one of the License Activation described in the next section below.

License Activation

You have the following 3 options to enter your License Key:

1. Enter the License Key into the corresponding "License Key" field in the web part configuration pane (See Description above).

2. WSP Solution Deployment:

Add the **License.txt** file (as supplied by AMREIN ENGINEERING after having purchased a license) to the Solution at the following location:

```
c:\Program Files\Common Files\Microsoft Shared\Web Server Extensions\12\template\features\AEEmployeeDirectoryWebpart
```

3. Manual Deployment:

Add the License Key to your web.config (typically found at c:\inetpub\wwwroot\wss\virtualdirectories\80) **<appSettings>** section as follows:

```
<appSettings>  
  <add key="AESD" value="AESD-x-xxxxx-xxxxx-xx-xx" />  
</appSettings>
```

Replace the "x" characters with your actual key values.

Please note that this method requires you to manually add the key to each Sharepoint application.
