

Web Part Installation Instructions for SharePoint 2019

“Modern” Pages

- Download the web part (“SP2019” version) zip file from the product page on our website at <http://www.amrein.com>
- Deploy the farm solution as described in the instructions.
- Extract the **aewebpart.sppkg** file contained in the downloaded zip file
- Upload the file to the Sharepoint App Catalog at “/sites/AppCatalog” (“Apps for SharePoint”).
- You now can insert the “**AE Webpart**” web part onto a “modern” page:

- proceed to configure the web part:

Title:
enter the optional web part title

Web Part:
enter the web part name.

Examples:
[AEWeather](#)
[AEBlogRollup](#)
[AEGoogleMap](#)

Configuration:
enter one or more web part configuration parameters (place each onto a separate line)
You can find the available parameters on the corresponding product web page.

Example:
`address=Rohrerstrasse 100 Arau`
`zoom= 10`

Height:
enter the optional web part height in pixels

License Key:
enter your Product License Key (as supplied after purchase of the "Weather Web Part" license key).
Leave this field empty if you are using the free 30 day evaluation version.

AE Webpart ✕
