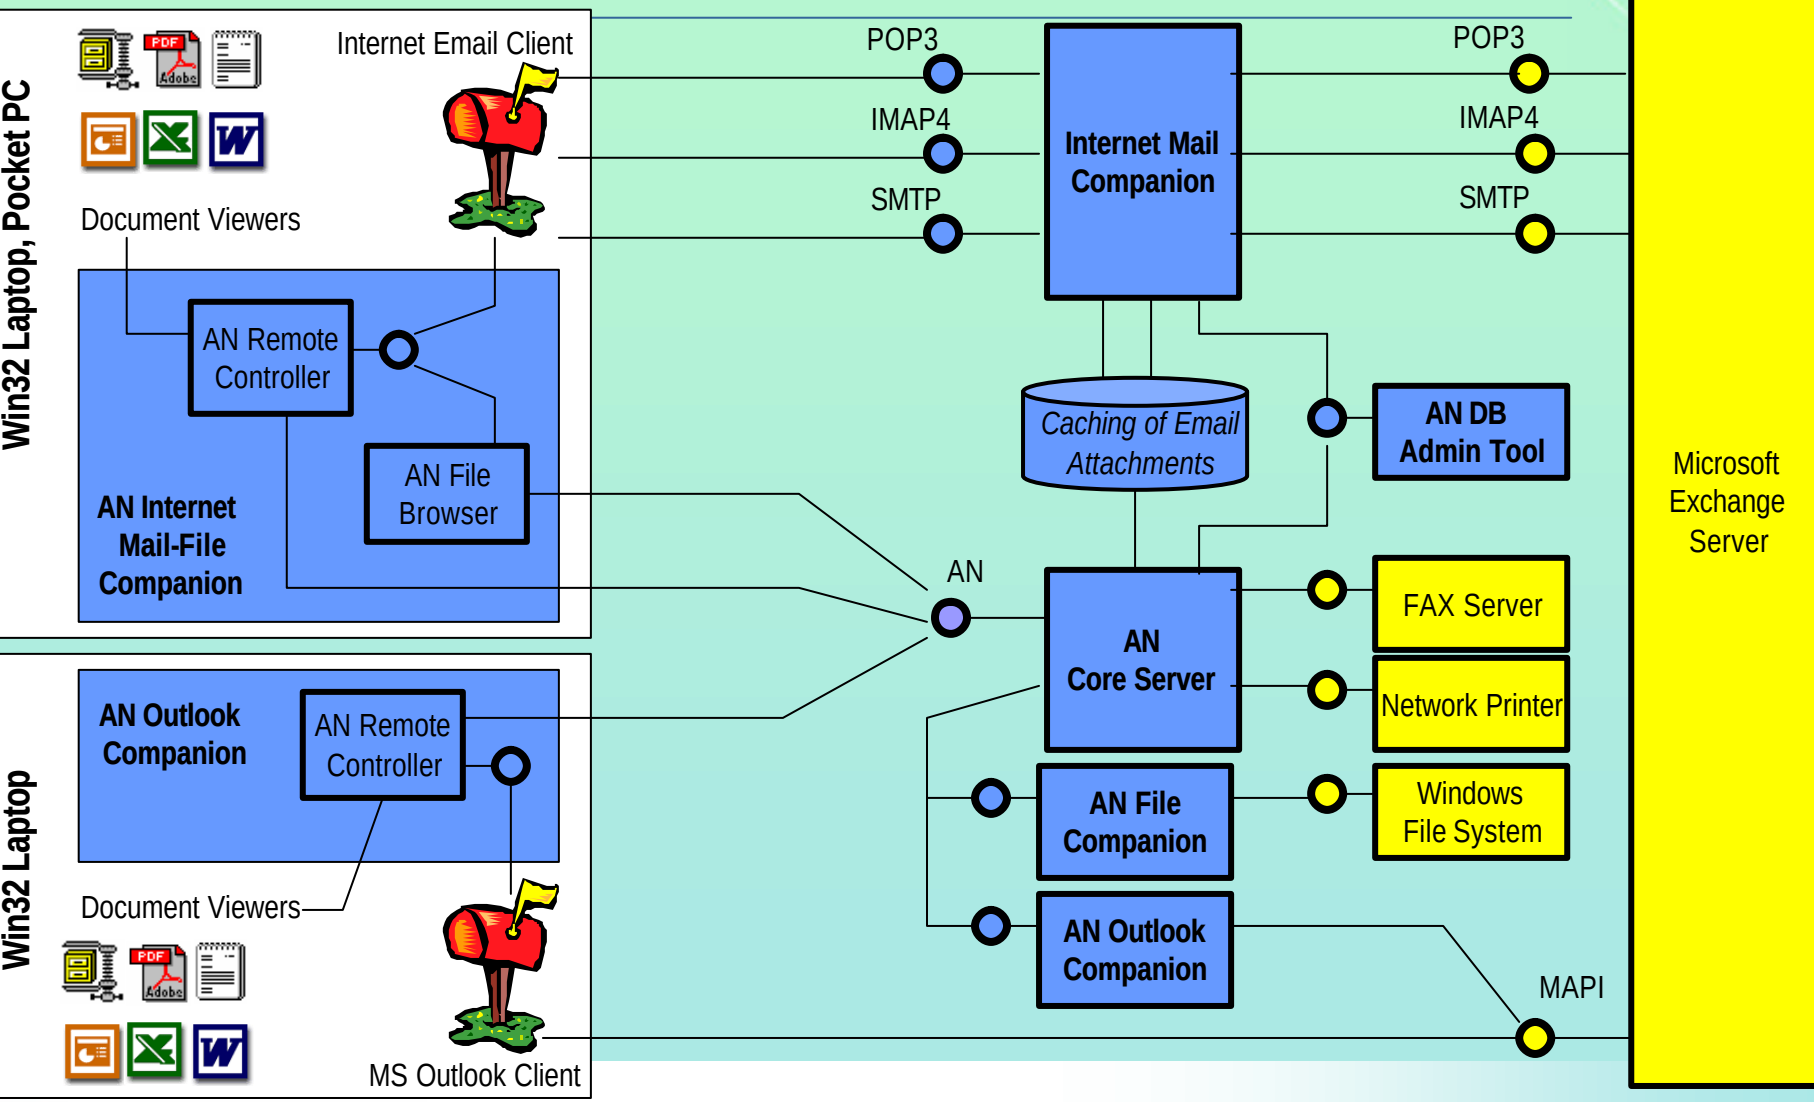
Software Architecture



Positioning with Microsoft

- **InfoRemote is based on a single-server architecture for multiple devices as required by enterprises**
- **InfoRemote offers complementary functionalities to Microsoft products for the total Out-of-Office user experience**
- **InfoRemote products enables simple, non-intrusive integration as an add-on to Microsoft products (Exchange, Outlook, MMIS, OMA,…)**
- **InfoRemote focus on the effective handling of attachments, files and documents from anywhere and any device**
- **InfoRemote supports Exchange 5.X, Exchange 2000, Outlook 97, Outlook 2000 and Outlook XP**
- **InfoRemote will continue to integrate with Microsoft Mobility solutions and features (MMIS) as they become available (eg PIM synchronization)**

Benefits for the Enterprise Users

- Sales Professionals
- Service Professionals
- Consultants
- Executives

Mobile Office

- **Smart handling of attachments and files**
  access only what you need when mobile
- **Remote Act on Demand**
- **Speed of work – enhance productivity**
- **Flexibility to use any mobile device**
- **Easy to switch between devices**
- **Consistency of user experience**
- **Adapt to work habits**
- **Ease of use with minimal training need**

Powered by ActiveNet™
